CLEANING PIPES WITH MULTIPLE ELBOWS

DERC Speed Regulated Pipe Cleaner, SPC

DERC Speed Regulated Pipe Cleaner (SPC) is the ideal rotating nozzle for cleaning horizontal and vertical pipes with multiple elbows. The compact, stainless steel design ensures that this nozzle can unplug, polish or run longer lines without a problem.

The DERC SPC Centralizer makes it possible to centre the DERC SPC, thus protecting the rotating nozzle and achieve the best cleaning result.

Two sizes: SPC-L and SPC-M

The rotating speed can be adjusted, depending on the level of deposit. DERC SPC is available in two sizes: SPC-L and SPC-M. The SPC-M is designed and constructed for water-blast cleaning of pipes as small as 4" with elbows. The SPC-L is developed to clean pipes of 6" and up.
